Today, covering an area of 609 square kilometers, this solar power base boasts a power generation capacity of 8,430 megawatts, making it the largest in the world, according to Qeyang, deputy director ...

Amid China's green energy revolution, the world's largest solar photovoltaic power plant on the Qinghai-Xizang Plateau is forging a unique development path, simultaneously generating ...

In the photovoltaic business, while the industry still faces numerous challenges, Xingshuaier is poised to secure a more advantageous market position through technological innovation, product upgrades, ...

In fact, Hangzhou Xingshuaier Electrical Appliances Co., Ltd. has just crossed the border into the photovoltaic field in 2021, and its 2G W photovoltaic module project will soon be put into operation.

On June 27, * ST Mubang and Xingshuaier issued announcements respectively, disclosing the latest progress of 10g W photovoltaic cell project and 2GW high-efficiency solar photovoltaic module ...

The solar installations are expected to generate over 67 million kWh of clean electricity annually, enough energy to power over 7,560 US homes for an entire year.

On the evening of August 20, two photovoltaic listed companies disclosed their semi-annual reports for 2025, namely Hengdian Dongci and Xingshuaier. See below for details:

A photovoltaic project with a power generation capacity of 900 megawatts (MW) went into operation on Sunday in northwest China's Qinghai Province.

Xingshuaier announced that fule new energy, the holding subsidiary of the company, plans to purchase real estate from the Management Committee of Huangshan economic ...
