OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

Our focus lies in delivering effective and creative Solar and Lighting products, based on our mega factories in China. By offering end-to-end energy solutions and services, we attract more clients ...

Renewable energy is taking a stronger foothold in the Freeport Area of Bataan (FAB) as the Authority of the Freeport Area of Bataan (AFAB) partners with Tai Yang 1 Power Inc. for the ...

Solar power in China China's solar potential Wind and solar surpassed a quarter of China's electricity generation for the first time in April 2025.

The project will rise on a 27-hectare property and is among the largest renewable energy developments within the Freeport Area of Bataan (FAB) to this day. When it becomes operational, it ...

700MWp PV Desertification Control Power Station Project in Baofeng, Ningxia Hui Autonomous Region.

An aerial view of the construction site of a 1-million-kilowatt solar-thermal energy-generation and storage project in Hainan Tibetan Autonomous Prefecture, Qinghai province, China, ...

China is set to have more solar power capacity than coal for the first time this year, marking a "historic" milestone in the country's energy transition. Data released on Monday by a ...

The operation of the power station with capacity of 1,000 megawatts features a composite industrial model of photovoltaic power generation, water-surface halogen production and underwater ...

Yang Solar Power Generation Project

Since 2009, China has been promoting the application of solar energy in the field of construction, implementing the "Golden Sun Project" to provide financial subsidies for rooftop PV ...
